AJPOWER WORKFORCE · LESSON 01 · SITE TEAM

Site attendance & face registration

Sign in, register a face, confirm attendance and scan the next person.

1. **Sign in to your site**

   Use the site login ID and password supplied by HR.

2. **Register once**

   First-time users choose Register face. Already registered? Use the punch button.

3. **Follow the camera prompts**

   Allow location and camera. Use good light and make only small head turns.

4. **Check the four photos**

   Make sure your face is clear. Retake if needed, then use the photos.

5. **Punch attendance**

   Registration does not create attendance. Tap Punch now to record your arrival.

6. **Check your name**

   Confirm only your own name and the IN or OUT direction shown.

7. **Use one device for many people**

   Tap Scan next person, or Punch in / out after the screen returns. Confirm each person’s own name.

> **Attendance, one person at a time**
>
> Use the same site login for your team. Repeat visits support IN → OUT → IN → OUT. Accidental rescans within two minutes are ignored.

Video: 01-site-attendance-face-registration-with-audio.mp4 · 1:08
Sample data and simulated actions. Follow company-approved rules in the live app.

Paper attendance & site registers

Enter a paper sheet, send it for HR approval and track its status.

1. **Open site tools**

   Choose More, then Manual attendance.

2. **Start one sheet for the day**

   Create a new attendance sheet. Explain why paper attendance is being entered.

3. **Find and add an employee**

   Search by name or employee code. Add each person only once.

4. **Enter the actual times**

   Record punch in and punch out. Use next-day only for an overnight shift.

5. **Give HR the reason**

   Explain the network or camera issue. Check the date and employee times.

6. **Send the sheet to HR**

   Sending does not record attendance immediately. HR must review and approve it.

> **Track the submitted sheet**
>
> HR has three days after receipt to review it. Unapproved sheets expire; reconnecting never sends an entry automatically.

Video: 02-paper-attendance-site-registers-with-audio.mp4 · 1:01

Sample data and simulated actions. Follow company-approved rules in the live app.

AJPOWER WORKFORCE · LESSON 03 · SITE TEAM

Site transfers & attendance registers

Request a transfer, then use daily and monthly registers to check attendance.

1. **Open Registers**

   Daily attendance shows punch times, worked hours and overtime at this site.

2. **Check another day**

   Use the date selector and search to find the person you need.

3. **Review the month**

   Switch to Monthly register. Expand daily punches to inspect repeat visits and overtime.

4. **Request a site transfer**

   Choose More, then Transfer requests. This does not create an attendance punch.

5. **Choose the employee and destination**

   Only employees currently at this site appear in the transfer search.

6. **Send the request**

   Check departure date, enter a reason and send it to HR.

> **Transfer approval is separate**
>
> The employee still punches out at the source site and punches in at the destination. Check the request status for HR’s decision.

Video: 03-site-transfers-attendance-registers-with-audio.mp4 · 1:01

Sample data and simulated actions. Follow company-approved rules in the live app.

Offers & joining

Issue an offer, record acceptance and begin the joining checklist.

1. **Start with an offer**

   Open Hiring and onboarding, then issue an offer for the new person.

2. **Enter the person and role**

   Use the agreed name, contact number, designation and department.

3. **Set pay and joining dates**

   Choose the pay group and salary structure. Enter the agreed annual gross.

4. **Review before issuing**

   Check the salary preview and dates before creating the offer.

5. **Record acceptance**

   Use Mark accepted only after the candidate has accepted the offer.

6. **Begin onboarding**

   Confirm the actual joining date. Then complete the person’s onboarding checklist.

> **An offer becomes a joining record**
>
> Complete the required identity, bank and onboarding items before activation. Retrieve generated letters from the employee profile.

Video: 04-offers-joining-with-audio.mp4 · 1:02

Sample data and simulated actions. Follow company-approved rules in the live app.

Enter an employee salary

Choose the salary structure, enter gross pay and check the calculated breakup.

1. **Open Salary and statutory**

   Start from the employee profile. A first salary needs a structure and effective month.

2. **Enter the agreement**

   Enter the agreed annual gross and choose the structure for this employee.

3. **Choose when it starts**

   Use the correct effective month and a reason. Historical locked payroll remains protected.

4. **Check the preview**

   Review monthly earnings, deductions and take-home before saving.

5. **Save the salary**

   Wait for confirmation. The saved salary breakup appears on the profile.

> **Keep salary history clear**
>
> Use a new effective revision when an agreement changes. Pay group rules and the employee salary structure are separate settings.

Video: 05-enter-an-employee-salary-with-audio.mp4 · 0:53

Sample data and simulated actions. Follow company-approved rules in the live app.

PF, ESI & tax declarations

Check employee statutory selections and enter tax declarations.

1. **Open the statutory settings**

   Salary and statutory keeps employee selections together.

2. **Check PF and EPS**

   Use the employee’s eligibility. EPS is an allocation within the employer PF contribution.

3. **Check ESI eligibility**

   The profile selection, salary components and effective rates work together. Follow the approved company rules.

4. **Choose a tax regime**

   This example uses the old regime to demonstrate employee declarations.

5. **Enter the declarations**

   Enter annual 80C and 80D amounts, and monthly rent, from the employee’s declaration.

6. **Save the declarations**

   Check the amounts and save. Statutory switches save their selections separately.

> **Review eligibility before payroll**
>
> Employee settings enable the applicable calculation. The structure defines wage components; published rates define percentages and ceilings.

Video: 06-pf-esi-tax-declarations-with-audio.mp4 · 1:01

Sample data and simulated actions. Follow company-approved rules in the live app.

AJPOWER WORKFORCE · LESSON 07 · SETUP

Build a salary structure

Name the structure, review wage components and check the live salary preview.

1. **Name the structure**

   Use a name that explains who the structure is intended for.

2. **Review the earnings**

   Each component has its own calculation and frequency. Inspect the default breakup.

3. **Check statutory wage flags**

   PF wage and ESI wage are separate selections. Keep the company-approved component treatment.

4. **Check the calculated preview**

   Review the sample earnings and employer costs. A preview is not a saved employee agreement.

5. **Create the structure**

   Save only after reviewing the components and preview.

> **Assign it to the employee salary**
>
> A saved structure is available for salary entry. Changing a pay group does not automatically replace the employee's structure.

Video: 07-build-a-salary-structure-with-audio.mp4 · 0:53
Sample data and simulated actions. Follow company-approved rules in the live app.

AJPOWER WORKFORCE · LESSON 08 · SETUP

Pay groups & policy selection

Create a pay group with a calendar, shift and the right attendance policies.

1. **Name the pay group**

   Group people who share the same working and payroll rules.

2. **Review the payroll calendar**

   Check the pay day and calendar method before continuing.

3. **Set weekly off and shift**

   Check weekly off days and the assigned shift for this group.

4. **Choose the policies**

   Select attendance and overtime policies. Their versions apply by effective date.

5. **Review and create**

   Verify the complete group summary before saving.

> **Assign the right people**
>
> Use the pay group member controls or employee profile to move people into the group. Salary structures remain employee-specific.

Video: 08-pay-groups-policy-selection-with-audio.mp4 · 0:53
Sample data and simulated actions. Follow company-approved rules in the live app.

AJPOWER WORKFORCE · LESSON 09 · SETUP

Set attendance grace

Review a policy version and set the approved grace minutes with an effective date.

1. **Find the attendance policy**

   Open policy history to inspect its versions and date coverage.

2. **Choose the correct version**

   Check which pay group uses the policy and the dates it covers.

3. **Enter the approved grace**

   This example allows 20 minutes. The live explanation shows what the rule means.

4. **Check the effective date**

   Confirm the version dates. Locked payroll can protect a version from changes.

5. **Save the policy version**

   Wait for confirmation, then check the updated version history.

> **Grace comes from the assigned policy**
>
> HR sets the attendance policy; the employee receives it through their pay group. Review version dates when rules change.

Video: 09-set-attendance-grace-with-audio.mp4 · 0:53
Sample data and simulated actions. Follow company-approved rules in the live app.

Review attendance & paper sheets

Correct a selected day with a reason, then review a site’s paper attendance sheet.

1. **Start with the employee calendar**

   Check monthly totals, then select the date that needs review.

2. **Review the day evidence**

   Check punch times, worked hours and late minutes before choosing a correction.

3. **Save a reasoned correction**

   Only mark a full day after verification. Keep the reason in the audit history.

4. **Open a submitted paper sheet**

   In Approvals, review the sheet and all included employees before approval.

5. **Correct an employee row**

   This example adjusts a departure time and records why.

6. **Approve the reviewed sheet**

   Approval records attendance for included employees. Check the confirmation before closing.

> **Correct first, approve deliberately**
>
> A sent sheet is not attendance until approved. HR has three days after receipt; locked payroll and expired sheets remain protected.

Video: 10-review-attendance-paper-sheets-with-audio.mp4 · 1:01

Sample data and simulated actions. Follow company-approved rules in the live app.

Loans, advances & recoveries

Record a loan or advance, set the repayment plan and review the outstanding balance.

1. **Record the approved loan**

   Open Advances and loans, then choose New loan.

2. **Set the repayment plan**

   Choose the person, principal and number of monthly instalments.

3. **Check and save**

   Verify the repayment amount and start date before recording the loan.

4. **Record an advance**

   Use New advance for an amount with a chosen monthly recovery.

5. **Set the advance and recovery**

   Keep the monthly instalment within the advance amount and record its purpose.

6. **Track the balances**

   The list shows recovered and outstanding amounts. Payroll reviews the due recoveries automatically.

> **Check recoveries in payroll**
>
> Review automatic instalments in the One-time adjustments step. Recovery limits can carry an unpaid amount forward; do not add the same deduction twice.

Video: 11-loans-advances-recoveries-with-audio.mp4 · 1:01

Sample data and simulated actions. Follow company-approved rules in the live app.

Final settlement adjustments

Review an exit settlement and add an approved manual earning with a reason.

1. **Review the settlement first**

   Check the employee, last working day and calculated earnings and deductions.

2. **Add an approved earning**

   Use Add earning for an amount that needs to be entered manually.

3. **Describe the adjustment**

   Use a meaningful name, amount and approval reason.

4. **Save and review the updated total**

   Wait for the settlement to refresh before making another change.

> **Check clearance and payment choice**
>
> Review deductions, loans and manual changes before payment. In payroll, confirm whether F&F is paid with payroll or recorded separately.

Video: 12-final-settlement-adjustments-with-audio.mp4 · 0:46

Sample data and simulated actions. Follow company-approved rules in the live app.

AJPOWER WORKFORCE · LESSON 13 · PAYROLL

Run monthly payroll, step by step

Review attendance through adjustments, generate figures, lock payroll and record payment.

1. **Choose and check the month**

   Check the payroll month and company view, then continue to the first review.

2. **Attendance**

   Check missing punches, paid days and overtime. Resolve pending paper sheets first.

3. **Joiners and exits**

   Check joining and exit dates so the month is paid for the correct service period.

4. **Employee checks**

   Resolve blocking bank, identity or salary issues before confirming.

5. **Held salaries**

   Review who is held and any released amount. Held pay stays out of the bank file.

6. **Final settlements**

   Review leavers, clearance and how each settlement will be paid.

7. **One-time adjustments**

   Review extra earnings, deductions and automatic loan recoveries before confirming.

8. **Generate the reviewed payroll**

   Check the preview totals and generate once all six reviews are confirmed.

9. **Review reports, then lock**

   Check the saved reports and bank totals. Lock freezes this payroll for payment.

10. **Record a completed payment**

    Mark paid only after the transfer is completed. Enter the real bank payment reference.

> **The month is recorded as paid**
>
> Mark paid records your payment reference; it does not transfer money. Keep the approved reports and bank confirmation together.

Video: 13-run-monthly-payroll-step-by-step-with-audio.mp4 · 1:31
Sample data and simulated actions. Follow company-approved rules in the live app.

AJPOWER WORKFORCE · LESSON 14 · PAYROLL

Payroll & statutory reports

Find the salary register, PF, ESI, PT and TDS reports, then download a filtered report.

1. **Start from generated payroll**

   Reports show the saved run. Check the month, company and employee filters.

2. **Provident fund report**

   Review PF wages, employee PF, employer EPF and EPS. Check employee identifiers before filing.

3. **ESI report**

   Review eligible wages and employee and employer contributions.

4. **Professional tax report**

   Check the state treatment and deduction amounts for the selected month.

5. **TDS report**

   Review tax deductions alongside the saved salary and employee tax declarations.

6. **Bank payment report**

   Reconcile payment totals and held salaries before sending the bank file.

7. **Download the report**

   Choose the salary register and CSV. XLSX is also offered for spreadsheet work.

> **Keep reports with the approved month**
>
> Use the report chooser for payslips, settlements, analysis and adjustments too. Sample amounts here explain the interface, not statutory filing values.

Video: 14-payroll-statutory-reports-with-audio.mp4 · 1:08
Sample data and simulated actions. Follow company-approved rules in the live app.

AJPOWER WORKFORCE · LESSON 15 · SETUP

Publish statutory settings

Review company-wide statutory rates and publish an effective-dated version.

1. **Review the current rates**

   Rates are company-wide and effective-dated. Check PF, EPS, ESI and recovery limits.

2. **Check percentages and ceilings**

   Enter only approved rates. This demonstration keeps the existing sample values.

3. **Check the ESI overtime setting**

   The eligibility ceiling and contribution wage are different. Confirm the treatment with your payroll adviser.

4. **Choose the effective date**

   The new version starts from this date. Already-run months retain their saved rate snapshot.

5. **Publish after review**

   Check every field before publishing the new version.

> **Settings and employee eligibility work together**
>
> Review professional-tax slabs and tax regimes on the same page. Confirm the applicable rules before the first live payroll run.

Video: 15-publish-statutory-settings-with-audio.mp4 · 0:54
Sample data and simulated actions. Follow company-approved rules in the live app.

AJPOWER WORKFORCE · LESSON 16 · HR OPERATIONS

Record and approve leave

Choose the employee and dates, check working days and record an approved leave request.

1. **Select the employee**

   Open Leave and record a request for the correct person.

2. **Enter the leave dates**

   Choose the leave type and dates. Check working days and any balance warnings.

3. **Keep the reason with the request**

   Explain the absence. Approve now is for an already-authorised request.

4. **Record the approved leave**

   Review the preview, then save and approve. Check that the dialog closes successfully.

> **Check the leave status**
>
> Only approved leave affects the attendance calculation. Recheck the employee calendar before confirming payroll attendance.

Video: 16-record-and-approve-leave-with-audio.mp4 · 0:46
Sample data and simulated actions. Follow company-approved rules in the live app.

Hold and release salary

Start an authorised salary hold and release a previously calculated held month into payroll.

1. **Review the held salary list**

   Held salaries are calculated, with statutory deductions, but kept out of the bank file.

2. **Choose who and when**

   Select the employee and the first payroll month to hold.

3. **Record the authorised reason**

   Check the person and month before saving the hold.

4. **Release an existing held month**

   This example releases Bhavana’s calculated September amount. Choose Release on her record.

5. **Choose how it will be paid**

   Pay with payroll queues the held month into that payroll. Paid separately requires an actual payment reference.

6. **Confirm the release**

   Review the held month and amount before confirming.

> **Release does not send a bank transfer**
>
> A queued held month is paid when its chosen payroll runs. Review the released amount in the payroll and bank report.

Video: 17-hold-and-release-salary-with-audio.mp4 · 1:01

Sample data and simulated actions. Follow company-approved rules in the live app.

AJPOWER WORKFORCE · LESSON 18 · PAYROLL

One-time earnings & deductions

Add a targeted bonus with its approval note and review automatic loan recoveries.

1. **Review the adjustment step**

   Use One-time adjustments for an extra earning, reimbursement or deduction for this month.

2. **Name and value the item**

   This example adds a taxable project bonus. The amount is per person.

3. **Choose exactly who receives it**

   Selected people prevents an item being applied to everyone by mistake.

4. **Keep the approval note**

   Record why it is paid and who approved it. Recheck the person count and total.

5. **Save and inspect the item**

   The saved item appears in the month’s list. Review its amount and recipients.

> **Check automatic recoveries too**
>
> Loan and advance instalments come from their repayment plans. Do not enter them again as manual deductions. Confirm adjustments after reviewing both.

Video: 18-one-time-earnings-deductions-with-audio.mp4 · 0:53
Sample data and simulated actions. Follow company-approved rules in the live app.

Delete records with name confirmation

Understand linked-record blockers and the exact-name deletion confirmation.

1. **Check linked employees first**

   Use the pay group action menu. Deletion is blocked while employees are still linked.

2. **Move assignments before deletion**

   Review the blocking employee list. Reassign employees before deleting a group or salary structure.

3. **Review employee deletion separately**

   For an employee, use More employee actions and read the effects before proceeding.

4. **Type the exact record name**

   The employee code does not confirm deletion. Type the displayed name exactly.

5. **Cancel when you only need to inspect**

   This lesson cancels the deletion. In the live app, confirm only the record you intend to remove.

> **Use employee exit for normal departures**
>
> Delete deliberately. The app preserves paid payslips, attendance and audit history and checks linked records before removal.

Video: 19-delete-records-with-name-confirmation-with-audio.mp4 · 0:53
Sample data and simulated actions. Follow company-approved rules in the live app.
